WORK EXPERIENCE

HOTHOUSE

UI/UX Developer (September 2016 – Present)

Creating web pages or web applications matching business requirements, wireframe interactions, and/or visual designs using HTML5, CSS3, Angular, Bourbon Neat, GIT, Handlebars, SCSS, and other web technologies. Building modular CSS and HTML content that facilitates creation of component libraries and easy back end integration. Creating customized WordPress themes.

PERFICIENT

Senior Front End Developer (June 2015 – September 2016)

Creating web pages or web applications matching business requirements, wireframe interactions, and/or visual designs using HTML5, CSS3, jQuery, JavaScript and other web technologies. Using Bootstrap, GIT, Atom, Adobe Brackets, Assemble, Handlebars, Sass/SCSS, and other tools to aid in the web development process. Image optimization using Adobe Photoshop/Fireworks. Meeting with clients and scrum team to obtain requirements, provide updates and make suggestions for improvement. Creating documentation to aid back end developers in implementing front end code. Leading creative review process, tracking changes, and making necessary updates.

ON THE MAP MEDIA

Owner/Graphic Designer & Web Developer (July 2011 – Present)

Meeting with clients to determine graphic design/web development needs. Creating website prototypes/wireframes/mockups using Adobe Fireworks. Reviewing prototype with client for approval and making revisions as needed. Custom website development using Adobe Dreamweaver, HTML/5, CSS/3, JavaScript, jQuery, and PHP. Image editing and image optimization using Adobe Photoshop and/or Adobe Fireworks. WordPress customization. Configuring content management systems.

FLORIDA SOUTHWESTERN STATE COLLEGE

Webmaster/UX Designer & Developer (December 2012 – February 2015)

Developing and updating web pages with HTML, CSS, jQuery and PHP using Sublime Text based on user requirements. Creating custom graphics used throughout College website using Adobe Fireworks and Illustrator. Optimizing images to minimize page load time. Interviewing stakeholders to determine the best solution to meet their goals. Developing wireframes/prototypes/mockups for new projects using Adobe Fireworks. Integrating web applications with data obtained from Banner ERP system. Creating web forms for use with the Banner Workflow system. Coordinating activities within web services and other areas of IT to ensure projects are completed timely and within scope. Developing the branding for third party web applications. Documenting web practices and procedures. Creating video clips using Adobe After Effects. Maintaining the mobile application. Developing and incorporating responsive design throughout the website.

Applications Support Specialist (July 2009 – December 2012)

Interviewing stakeholders to identify business rules and functional requirements needed to implement new systems. Identifying and documenting technical requirements and coordinating tasks with programmers, database administrators and other areas of IT to ensure projects are completed timely and within scope. Communicating project progress with stakeholders. Following SDLC standards when implementing new systems/projects. Maintaining modules within the Banner ERP system and various third party applications. Writing queries and creating reports in SQL Developer, MS SQL Studio, MS Access, Crystal Reports, Argos and other programs. Providing end-user training, end-user documentation, and technical documentation for projects.
